PROFESSIONAL SUMMARY

Backend engineer with 5 years of experience building scalable Python microservices, REST APIs, and data pipelines. Strong focus on system design, observability, and developer tooling.

TECHNICAL SKILLS

Languages: Python, Go, SQL, Bash

Frameworks: FastAPI, Django, Flask, gRPC

Databases: PostgreSQL, Redis, MongoDB, Elasticsearch

Infrastructure: Docker, Kubernetes, Terraform, AWS (EC2, RDS, S3, Lambda)

Tools: Git, GitHub Actions, Prometheus, Grafana, Celery, RabbitMQ

Testing: pytest, unittest, Postman

EXPERIENCE

Senior Backend Engineer — DataStream Inc., Chicago, IL

Jan 2022 – Present

- Designed and deployed a high-throughput event ingestion service (FastAPI + Kafka)
 - processing 2M+ events/day with <50ms p99 latency
- Migrated monolith to microservices, reducing deployment time by 60%
- Built internal developer CLI tooling used by 30+ engineers
- Introduced structured logging with OpenTelemetry; reduced MTTR by 40%

Backend Engineer — CloudOps Solutions, Chicago, IL

Jun 2019 – Dec 2021

- Built RESTful APIs using Django REST Framework serving 500K daily active users
- Optimized PostgreSQL queries (added indexes, rewrote N+1s); avg query time -70%
- Implemented background job processing with Celery + Redis
- Wrote integration tests achieving 85% code coverage

EDUCATION

Bachelor of Science in Computer Science

University of Illinois at Chicago — 2019

CERTIFICATIONS

AWS Certified Developer – Associate (2022)

Docker Certified Associate (2021)

PROJECTS

EventBridge CLI (github.com/aisharaza/eventbridge-cli)

A developer tool for testing and replaying Kafka events locally.

Built with Python, Click, Kafka, Docker

PGOptimizer

Automated PostgreSQL slow query analyzer with actionable recommendations.

Technologies: Python, psycopg2, PostgreSQL, Flask
